- An average of 100 confined space related deaths occur each year in United States workplaces.
- Do you know what a confined space is?
- Have you identified all the confined spaces in your workplaces?
- Do you have any permit-required confined spaces?
- What are the potential atmospheric hazards of your confined spaces? Physical hazards?
- Do your workers have confined space training? Is it understood? Documented?
- Will "911" provide a confined space rescue for you?

If you cannot answer one or more of the above questions, you may need confined space training. Consider this training to answer your questions.
