Increase your Cybersecurity Defenses with CyberNET!

MIIA members have access to FREE cybersecurity services to minimize the likelihood of a data breach and safeguard you against the most prevalent cyber threats of today: ransomware and email fraud.

CyberNET has the tools you need to strengthen your cybersecurity defenses by training your staff to recognize dangerous phishing emails, improve your incident response plans, harden your applications and systems, identify gaps in your network perimeter and more!

Join our webinar highlighting these services and how they can be used to protect your data and other sensitive assets. For example, available cybersecurity services include:

Phishing Simulations – 90% of cyberattacks start with phishing emails. Understanding the importance of safeguarding your organization against phishing attacks is crucial. Phishing simulations help train your users to identify dangerous emails.

Online Training – Training your employees is one of the best ways to prevent a data breach. Educate your users on key cybersecurity and privacy issues with online training courses.

Unlimited Advice – With a wealth of industry experience in privacy/data security, risk assessments, cyber risk mitigation, and data breach prevention, ePlace experts are well-prepared to address all questions you may have. No inquiry is too big or too small – we welcome them all and are here to assist you with your needs, regardless of the complexity.
