(Registration/coffee and pastries 7:45 a.m.  
light lunch included  
10 TCH

### RESOURCES

[THE NEW ENGLAND CONSORTIUM](#)

### PRESENTERS

The New England Training Consortium.

The New England Consortium has partnered with MIIA to lead this comprehensive 10-hour training, which emphasizes hazard identification, avoidance, control and prevention in the construction industry. Training is based on various topics in OSHA's Construction Industry Regulations.

The OSHA 10 Construction class is an "awareness" class not a detailed, exhaustive review of OSHA

regulations. Participants will engage in small group activities and discussion as well as a review of photos and videos. This 10-hour training will provide a general overview of OSHA and include the following topics:

- Value of Safety and Health
- OSHA Act, General Duty Clause, Employer and Employee Rights and Responsibilities, Whistleblower Rights and Recordkeeping Basics.
- Inspections, Citations and Penalties
- General Safety and Health provisions

The remaining training will address the OSHA Focus Four Hazards including:

- Fall Protection
- Electrical
- Struck by (e.g., falling objects, trucks, cranes)
- Caught in/between (e.g., trench hazards, equipment).

Also included will be:  
personal protective and lifesaving equipment, health hazards in construction, hand and power tools, stairways and ladders, scaffolds, aerial lifts, material handling, storage use and disposal, confined space, work zone safety, respiratory protection, trenching and lock-out-tagout.

Attendance at this seminar qualifies the MIIA member for 2% credit under the FY19 MIIA Rewards Workers' Compensation category.
