Safety Within Roadway Work Zones

Tuesday, July 23, 2024
9:00 a.m.- 11:00 p.m.
Virtual training
Must remain on camera at all times on a separate device to receive credit Please contact Mary Ann Marino - **mmarino@mma.org** if you will be viewing as a group
Register here

Participation in this seminar qualifies the MIIA member for .5% MIIA Rewards credit under the Workers Compensation Category

A Quote from the US Department of Transportation, Federal Highway Administration:
As our highway infrastructure ages, many transportation agencies are focusing on rebuilding and improving existing roadways. This means more roadwork is being performed on roadways that are open to traffic. At the same time, traffic continues to grow and create more congestion. The combination of more work alongside heavier traffic and greater use of night work can result in increased safety considerations for roadway workers. However, there are regulations and available resources on good practices that can help workers perform their jobs safely.

TOPICS OF DISCUSSION

Background and Statistics
Knowledge Check
Authorities Having Jurisdiction (AHJ)
OSHA Regulations and DLS Enforcement
Managing Safety and Health
Hazards and Safe Work Practices
Pre-Planning
Before Work Begins
Setting Up the Work Zone
During Work
Finishing the Work
Breaking Down the Site
Resources

ABOUT THE PRESENTER:
Kimlee Lindgen, MS, CHST
Kimlee is currently the Senior Risk Management Trainer for the Massachusetts Interlocal Insurance Association (MIIA). She has enjoyed various positions in the safety and health profession for over 43 years. Her expertise is in construction, maritime, education, insurance, and regulatory compliance. She has also been developing curriculum, and serving as an industry director and instructor for the OSHA Education Center for 33 years.
